

Sweet Hope

I got a sweet hope of glory
To tell my own story
Is it a change of direction
To find new connection
Can we see as one, can we be as one
For all together we can reach the sun

Now can we bring all our voices
To sing all our choices
And is it our generation
Who'll find emancipation
If they hear our sound we can turn it around
And all together we can reach the sun

Hope is looking forward with a smile, sometimes elusive
Hope is so essential to survive - stay optimistic

Now my friends feel like family
My family they feel like friends
And through the dark isolation
We see the light in collaboration
See as one we can be as one
For all together we can reach the sun

Hope can be a tangible thing, sometimes elusive
Hope can be a reason to sing - stay optimistic

All together in a song forever
Melody, rhythm and rhyme
Making music we belong together
Feeling like we're travelling in time

We got a sweet hope of glory
To change our own story
And as we dream innovation
We see liberation

n

As we break through there to the open air
And all together we can reach the sun
And all together til our journey's done
And all together til our journey's done
